PROFILE SUMMARY

AI Automation & Agentic AI Systems Architect with 1500+ hours of system engineering experience, delivering 200+ advanced automation workflows and integrating 100+ third-party APIs for clients across the USA, Ireland, and India. Specialize in architecting intelligent automation systems and agentic AI workflows that reason, decide, and act autonomously — replacing manual processes with zero-touch, scalable solutions. Proven track record of building end-to-end pipelines spanning AI agents, CRM enrichment, voice qualification, invoice processing, and predictive deal intelligence.

SKILLS

Automation Platforms: n8n, Webhooks, REST APIs

AI & LLMs: OpenAI, AI Agents, Classification, Voice AI, Prompt Engineering

Sales & CRM: HubSpot, Apollo, SalesQL, InboxPlus, Apify

Data & Docs: Google Workspace (Sheets, Drive, Calendar, Gmail), Airtable, Microsoft Excel, Outlook, OneDrive, Plex ERP

Content & Media: HeyGen, Cloudinary, LinkedIn API, WhatsApp API

WORK EXPERIENCE

AI Automation Engineer (Intern → Full-Time) – iTechNotion Pvt Ltd **2025/05/03 - Present** | Ahmedabad, Gujarat, India

- Architected and deployed 200+ advanced automation workflows and AI agent systems for clients across the USA, Ireland, and India, integrating 100+ third-party APIs (n8n, OpenAI, HubSpot, Apollo, Voice AI, Plex ERP) to replace manual processes with zero-touch, scalable solutions.
- Designed AI-powered lead enrichment and voice qualification pipelines (HubSpot, Voice AI, OpenAI, Apollo) that automated end-to-end CRM workflows, reducing manual lead research time for international clients.
- Built zero-touch invoice processing and deal intelligence systems (Plex ERP, OpenAI, Slack, Google Sheets) that eliminated manual data entry and provided predictive risk alerts for sales teams.
- Engineered autonomous email outreach and meeting intelligence workflows (n8n, InboxPlus, Apollo, Google Calendar) that managed multi-touch sequences and delivered pre-call briefings automatically.

PROJECTS

AI Enrichment Agent — Autonomous Data Processing System

- Architected an autonomous lead-enrichment workflow (n8n, OpenAI, Apify, SalesQL, Google Sheets) that detects new entries, gathers verified company/contact data from multiple sources, applies structured selection logic, and updates sheets automatically — replacing slow, inconsistent manual lead research.

Autonomous Outreach & Follow-Up Engine

- Engineered an end-to-end outbound engine (n8n, InboxPlus, AI personalization) that sends personalized emails, runs structured follow-up sequences, stops instantly on reply, and tracks sent/delivered/opened/replied metrics in a single dashboard.

AI Voice Lead Qualification & Follow-Up Orchestration Engine

- Built an AI voice orchestration system (HubSpot, Voice AI, OpenAI, Google Drive, Slack) that auto-triggers outbound calls on new CRM contacts, classifies intent, writes structured CRM notes, stores recordings, and sends intelligent follow-up emails with fallback sequences for unanswered calls.

Gmail AI Auto-Labeling & Prioritization System

- Designed a daily AI triage workflow (n8n, OpenAI, Gmail) that fetches unread emails, AI-summarizes and classifies each into FYI / Meeting Update / To Respond, and applies Gmail labels automatically — eliminating manual inbox sorting.

AI-Powered Invoice Processing & ERP Matching Engine

- Built a zero-touch AP pipeline (Outlook, OpenAI, Plex ERP API, Excel, OneDrive) that detects invoice emails, extracts structured data from PDFs with strict validation, matches POs against ERP, verifies amounts, updates Plex status, and archives renamed files to OneDrive.

AI-Powered Deal Intelligence & Risk Monitoring Engine

- Engineered a daily deal intelligence system (HubSpot, OpenAI, Slack, Google Sheets) that enriches active deals with engagement activity, AI-calculates conversion probability and risk levels, flags stalled deals, and pushes Slack alerts with recommended actions.

AI-Powered Pre-Call Meeting Intelligence Engine

- Designed a nightly meeting intelligence pipeline (Google Calendar, HubSpot, Apollo, OpenAI, Slack) that pulls next-day meetings, matches CRM records, enriches attendee companies via Apollo, and posts structured AI briefings to Slack/Discord.

AI-Powered WhatsApp Agent & Lead Management System

- Built a context-aware conversational WhatsApp agent (WhatsApp API, OpenAI, Google Sheets) that identifies intent, dynamically qualifies leads through follow-up questions, logs structured data by phone number, and confirms or escalates when complete.

EDUCATION

INDUS UNIVERSITY

2025

B.Tech Computer Engineering
CGPA – 9.30

CERTIFICATIONS

Core Java – Ananya Academy

2023-01-01 – 2023-04-01

MERN Stack Fullstack Development – Tops Technologies

2024-12-01 – 2025-05-01

LANGUAGES

English (Native), Hindi (Fluent), Gujarati (Fluent)
